Single-Vendor E-Commerce Platform

Functional Requirements

A dedicated selling website for one business. The owner manages products and orders through an admin dashboard. No marketplace or multi-vendor features.

1. Customer Features

Feature	Description
Home page	Store banner and featured products
Product browsing	Product list, detail pages, photos, description and price
Search and filters	Search by name and filter by category
Shopping cart	Add products, change quantity and remove items
Account	Register, log in/out and manage profile
Checkout	Enter delivery address, choose payment option and place order
My orders	See order history, current status and manually provided shipment details
Shipment tracking	View courier name, tracking ID and optional courier tracking link entered by vendor

2. Vendor / Admin Features

Feature	Description
Dashboard	Basic overview of orders, sales and products
Products and categories	Create, edit and delete products/categories; upload product images
Orders	View orders, customer delivery details and payment status
Manual order status	Set status: Pending, Processing, Shipped, Delivered or Cancelled
Manual shipment details	Enter or edit courier name, tracking ID, optional tracking URL and dispatch date
Customers	View customer list and order details

3. Website Pages

Area	Pages
Customer	Home; Products; Product Details; Cart; Checkout; Login/Register; My Orders; Profile; Contact Us
Admin	Dashboard; Products; Categories; Orders (including manual shipment tracking); Customers

4. Manual Shipment Tracking Workflow

1. Customer places an order; the order starts as Pending.
2. Vendor reviews and processes the order.
3. After dispatch, vendor selects Shipped and manually enters courier name, tracking ID, optional tracking URL and dispatch date.
4. Customer opens My Orders to see status and shipment details; any supplied tracking URL opens the courier website.
5. Vendor manually changes the order to Delivered when appropriate.

Scope note: No courier API, automatic courier status synchronization, live location tracking or automatic delivery updates. Tracking details and order status are maintained by the vendor.
